EDUCATION

University of Florida, Gainesville

GPA: 3.80/4.0

Master of Science, Computer Science

August 2023 – December 2024

Relevant Coursework: Programming Language Principles, Advanced Data Structures, Analysis of Algorithm, Computer Graphics, Distributed Operating System Principles, User Experience Design, Software Engineering, Natural Language Processing.

Bennett University, India

GPA: 3.71/4.0

Bachelor of Engineering, Computer Science

July 2019 - May 2023

Relevant Coursework: Object Oriented Programming, Data Structures, Operating Systems, Computer Network.

SUMMARY OF SKILLS

- **Programming Languages:** C++, C, C#, Java, Python, JavaScript, TypeScript, Lua, PL/SQL
- **Web & Cloud Development:** HTML, CSS, React, Angular, Node.js, .Net Core, AWS, Google Cloud, Docker, Kubernetes
- **Databases & Tools:** MySQL, SQLite, PostgreSQL, Git, GitHub, SVN, JUnit, PyTest
- **Game Development & Graphics:** Unity 3D, Android Studio, OpenGL, Blender
- **Data Science & OS:** Pandas, NumPy, Scikit-learn, Windows, Unix/Linux, macOS

PROFESSIONAL EXPERIENCE

University of Florida

Gainesville, Florida

Teaching Assistant

January 2024 - December 2024

Courses: Computer Graphics, Discrete Mathematics, Programming Language Concepts

- Designed course materials, graded assignments, and exams for **50+ students**, ensuring accurate and timely feedback.
- Conducted discussion sessions and lectures, simplifying complex topics in **computer graphics, discrete mathematics, and programming languages**.
- Held office hours to provide one-on-one support, improving student understanding and performance.

StreakByte

Ahmedabad, India

Game Development Intern

August 2022 – November 2022

- Spearheaded end-to-end development of **Slap and Run**, collaborating with cross-functional teams to deliver a high-quality mobile game.
- Designed and implemented the game's **visual frontend** using Unity, boosting **user engagement by 20%** through an intuitive and visually appealing interface.
- Optimized the **codebase and performance**, reducing loading times by **15%** and improving gameplay fluidity by **10%**.
- Integrated **graphics, animations, and sound effects**, and conducted rigorous testing to ensure a stable and immersive gaming experience.

Tatvic Analytics

Ahmedabad, India

Data Science Intern

June 2022 – July 2022

- Performed **exploratory data analysis (EDA)** using Python, Pandas, and NumPy, identifying key insights that improved machine learning model accuracy by **10%**.
- Conducted **data cleaning and preprocessing**, reducing inconsistencies by **20%** to enhance data quality for analysis.
- Built and evaluated **machine learning models** for predictive tasks, achieving an average accuracy rate of **80%**.
- Created insightful **data visualizations** using Matplotlib and Seaborn, enabling improved data interpretation.

ACADEMIC PROJECTS

Compiler

Tools: Java

- Designed and implemented a **Lexer and Parser** in Java to tokenize source code and construct syntactic structures for a custom programming language.
- Developed a **symbol table, scope visitor, and type checker** to enforce scoping rules and ensure semantic correctness, followed by bytecode generation for program execution.

ElderEase

Tools: Unity, Android Studio

- Designed an **Android app for elderly users** with features like medication reminders, emergency calling, and memory-boosting games.
